

## STUDENT TECH TEAM

Students at Hubbard Middle School are offered the opportunity to be actively involved in the use and implementation of technology on campus.

Under the supervision of Glenn English — Campus Technology Trainer, students receive training in many areas of technology including:

- Software Installation
- Network Printer Installation
- Networking
- Computer Maintenance

Students help to setup computer systems for teachers and students, maintain lab computers, and help other students in one of the several computer labs on campus.

Students also publish an electronic newsletter, the Hubbard Husky e-News - which is emailed to subscribers
